Hope Artificial Intelligence

Scenario Based Learning

A company works with number of employees, all the works are dependents on the employees. Even if one of the employees resign the job immediately then assigned work will be not finished at thetime, so delivery of the project to the clients will be delayed. Company planned to make solution for this, they want to know which employee may resign next. If they know previously, they can arrange alternative to avoid such problem. As an AI Engineer you must give Solution to this.

A) How will you achieve this in AI?
B) Find out the 3 -Stage of Problem Identification
C) Name the project
D) Create the dummy Dataset

A) We collect the inputs such as Years of experience , Salary, How many company shifted, last promotion, Last Hike
B) 3 stages
    a) Domain : Machine Learning
    b) Learning: Supervised Learning
    c) Classification
C) Employee Resignation Prediction
D) Data set

S.No	Name	Experience	Salary	How many company served	Last promotion in Years	Last Hike	O/p
1	Ram	16	12lpa	6	4	20,000	Resign
2	Janaki	20	26 LPA	2	3	80,000	Not Resign
